

# **ALERT** BUTTON ANDROID APP

**HOW TO  
INSTALL  
GUIDE**

# WHAT IS THE MISA ALERT BUTTON

---

**MisaAlertButton** is an Android app which can help you in case of an emergency situation. In case of an emergency you tap on a big red trigger button which causes the app to send out SMS to your preconfigured contacts without confirmation.

---

MisaAlertButton runs in the background and listens for incoming SMS this is why it needs permission to read your SMS

---

If an ingoing SMS contains a specific word AND is from a specific number then an alarm will go off and call the sender of the SMS in one minute.

---

Enough time for you to wake up and realize that the alarm has been triggered.

---

Your contact(s) can trigger your alarm with a simple SMS and vice versa. If your opponent doesn't have this app he will only see an SMS with the text "Panic" (by default) and your current GPS coordinates. This makes this app useful regardless of whether your contact has this app installed or not.

---

# HOW THE MISA ALERT BUTTON ANDROID APP

CAREFULLY READ THE INSTRUCTIONS BELOW

This version of the Misa Alert  
Button requires Android 6.0 or newer.

## PERMISSIONS

---

### RECEIVE TEXT MESSAGES (SMS)

MisaAlertButton runs in the background and listens for incoming SMS this is why it needs permission to read your SMS

---

### SEND AND VIEW SMS MESSAGEmmS

Allows the app to send SMS messages. This may result in unexpected charges. Malicious apps may cost you money by sending messages without your confirmation.

---

### ACCESS PRECISE LOCATION ONLY IN THE FOREGROUND

This app can get your precise location from location services while the app is in use. Location services for your device must be turned on for the app to get location. This may increase battery usage.

## DIRECTLY CALL PHONE NUMBERS

Allows the app to call phone numbers without your intervention. This may result in unexpected charges or calls. Note that this doesn't allow the app to call emergency numbers. Malicious apps may cost you money by making calls without your confirmation.

---

## HAVE FULL NETWORK ACCESS

Allows the app to create network sockets and use custom network protocols. The browser and other applications provide means to send data to the internet, so this permission is not required to send data to the internet.

---

## VIEW NETWORK CONNECTIONS

Allows the app to view information about network connections such as which networks exist and are connected.

Modify or delete the contents of your shared storage. Allows the app to write the contents of your shared storage.

---

## CONTROL VIBRATION

Allows the app to control the vibrator.

---

## READ THE CONTENTS OF YOUR SHARED STORAGE

Allows the app to read the contents of your shared storage.

## MISA Alert Button
